

**Wood Mulching Industries (WMI) is leading the way for best practice solutions and more innovative waste technologies in Swanbank.**

**WMI would like to take this opportunity to provide an update to our local community on progress of our upcoming Biogas and Composting Facility. Approved by Ipswich City Council on 22nd June 2022, WMI has since been busy working towards finalising leadup pre-works approvals and securing joint financing commitments necessary for the project to proceed. We are pleased to announce that the next stage of infrastructure works required onsite (East West Distributor Road) is anticipated for 2026. This will see us move to the start of the delivery stage of the Biogas and Composting project.**

We plan to align with the Qld Government's (DESI) planned objective of no odorous waste streams by September 2026 and remain committed as ever to our overall objective of transitioning from outdoor operations to a "state of the art" enclosed Composting and Biogas Facility which WMI has led the charge with at the forefront of industry for many years.

We thank you for your patience and encourage you to visit WMI's website to find out more and to obtain an update on progress throughout the construction phase of our facility (<http://www.woodmulching.com.au>).
